The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The preliminary amendment filed on 11/3/05 has been entered. In this amendment, claims 1-7 have been amended and claims 8-14 have been added. Overall, claims 1-14 are pending in this application.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Kawai (JP 10-280990).

Regarding claims 1, 2, Kawai discloses a device for restraining the deterioration of a catalytic apparatus of an internal combustion engine characterized in that, when the temperature of the catalytic apparatus arranged in the engine exhaust system is higher than a predetermined temperature in a vehicle deceleration, a fuel-cut of the engine is prohibited and a first motor-generator connected with the vehicle drive shaft is operated as a generator to charge an electrical accumulator (see translation, abstract, page 4, par. [0023, 0025], page 5, par. [0028, 0031]).

Regarding claims 3, 8, Kawai further discloses that a down-shift of an automatic transmission elevates the engine speed when said fuel-cut is prohibited (see translation, page 7, par. [0040]).

Application/Control Number: 10/555,409

Art Unit: 3748

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 4, 5, 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kawai (JP 10-280990) in view of Urasawa et al. (US patent 6,569,055).

Regarding claims 4, 9, Kawai discloses all the claimed limitations as discussed in claim 1 above however, fails to disclose that a second motor-generator connected with the output shaft of the engine is operated as a motor to elevate the engine speed when said fuel-cut is prohibited.

Urasawa teaches that a second motor-generator connected with the output shaft of the engine is operated as a motor to elevate the engine speed when said fuel-cut is prohibited (see col. 7, lines 40-47, 59-67, col. 8, lines 1-10).

It would have been obvious to one having ordinary skill in the art at the time the invention was made, to have utilized the teaching of Urasawa in the Kawai system, since the use thereof would have maintained desired drivability of the vehicle.

Regarding claim 5, Urasawa further teaches that said second motor generator uses the electrical energy stored in said electricity accumulator (see col. 2, lines 60-62)

Application/Control Number: 10/555,409

Art Unit: 3748

Allowable Subject Matter

Claims 6, 7, 10-14 are objected to as being dependent upon a rejected base claim, but

would be allowable if rewritten in independent form including all of the limitations of the base

claim and any intervening claims.

Conclusion

Any inquiry concerning this communication from the examiner should be directed

to Examiner Diem Tran whose telephone number is (571) 272-4866. The examiner

can normally be reached on Monday -Friday from 8:00 a.m.- 5:30p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Thomas E. Denion, can be reached on (571) 272-4859. The fax number for this

group is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 800-786-9199 (toll-free).
